Department of Zoology

Online Workshop and Lecture

2021-22

In the session 2021-22 a variety of activities were conducted by the Department of Zoology under the banner of Zoological Society. The session started with "Online Workshop and Lecture" event, which was organized from 8th June to 16th June, 2021. During the pandemic situation, when the college laboratory was not accessible by the students, an approach was taken by the Department of Zoology to organize an online workshop and lectures event for the students of Bajaj College of Science. In this activity, two guest lectures and a workshop was organized for the UG and PG students of the Biological stream of the college. The event was inaugurated by the lecture of Dr. Jayant Biswas, Director National Cave Research and Protection Organization. He delivered a talk on "Prospective and Challenges in the Studies of Cave Science". This was followed by a three day online workshop conducted by Ms. Kiran Yadav and Ms. Batul Pipewala from CUBE, HBCSE, TIFR. The workshop was on Isolation of soil nematodes from soil sample on a raw potato surface in Home labs and How to study the life cycle of an insect in a Home Lab. The event ended with a lecture by Dr. R. P. Chondekar, Associate Professor, BAMU, Aurangabad. He delivered a talk on "Memory basics". The online workshop and lectures encouraged the students to know about different scientific domains and improve their thinking abilities. Through the online workshop students learned how to culture and maintain life cycles of insects in their home labs as well as how to isolate nematodes from soil. These activities had enhanced the scientific approach and thinking of the students. About 100 students from BSc and M.Sc. participated in the workshop.
