### Appendix-8

**General Rules and Regulations regarding pattern of question paper, absorption scheme and choice based credit system:**

**A) Pattern of Question Paper**

1. There will be four units in each paper.
2. Maximum marks of each theory paper will be 80
3. Question paper will consist of five questions, each of 16 marks.
4. Four questions will be on four units with internal choice (One question on each unit).
5. Fifth question will be compulsory with questions from each of the four units having equal weightage and there will be no internal choice.

**B) Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA)**

M. Sc. Program shall consist of four semesters, wherein the student has to complete 100 credits. Each subject (or course) has fixed number of credits. The types of subject subheads are: Core, Core Practical, Core (Subject Centric), Core Elective, Core Elective Practical, Foundation Course, Seminar and Project/Review writing.

**Explanatory terms:**

1. **Core:** Major theory papers in the concerned subject.
2. **Core Elective:** These papers will be specialization in the concerned subject. Ex. Zoology – MRP, AP, Fisheries, Entomology etc.
3. **Foundation Course/Core (Subject Centric):** For details, refer Appendix 7.
4. **Project/Review writing:** Project / Review writing is in semester IV.
5. **Seminar:** The seminar in each semester shall be presented by the candidate in his/her parent department only.

**Credits:**

It is a unit by which the course work is measured. It determines the number of hours of instructions required per week. One credit is equivalent to one hour of teaching (lecture) or two hours of practical work / field work or two hours of seminar per week.

For example a subject with 4-8 (L- P) means it has 4 Lectures, 8 Practical in a week. This subject will have eight credits ( $4 \times 1 + 8 \times \frac{1}{2} = 8$ ). If a student is declared pass in a subject, then he/she gets the credits associated with that subject. Depending on the marks scored in a subject, student is given a Grade. Each grade has got certain grade points as follows:

Letter Grade	O	A+	A	B+	B	C	P	F	Ab
Grade Point	10	09	08	07	06	05	04	0	0

A student obtaining Grade F shall be considered failed and will be required to reappear for the examination.

**Valuation pattern:**

Every credit is for 25 marks and valuation and grade points will be given as per following pattern.

Marks obtained In Theory/Practical (Out of 100 marks)	Marks obtained In Theory/Practical (Out of 50 marks)	Marks obtained In Theory/Practical (Out of 25 marks)	Letter Grade	Grade point
91-100	46-50	23-25	O	10
81-90	41-45	20-22	A+	09
71-80	36-40	18-19	A	08
61-70	31-35	15-17	B+	07
51-60	26-30	13-14	B	06
41-50	21-25	11-12	C	05
= 40	=20	=10	P	04
<40	<20	<10	F	0
Ab	Ab	Ab	Ab	0

### Computation of SGPA and CGPA:

Following shall be the procedure to compute the Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA):

- The SGPA is the ratio of sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e

$$\text{SGPA (Si)} = \frac{\sum(C_i \times G_i)}{\sum C_i}$$

where  $C_i$  is the number of credits of the  $i^{\text{th}}$  course and

$G_i$  is the grade point scored by the student in the  $i^{\text{th}}$  course.

### Illustration for SGPA:

e.g. If student obtained following marks in Semester-I, then his/her SGPA shall be obtained as illustrated in below table

Code	Theory / Practical	Credits	Marks Obtained	Out of	Grade Point	Grade Letter	Credit Point (Credit x Grade Point)
Core 1	Paper 1	4	91	100	10	O	4x10=40
Core 2	Paper 2	4	89	100	9	A+	4x9=36
Core 3	Paper 3	4	50	100	5	C	4x5=20
Core 4	Paper 4	4	78	100	8	A	4x8=32
Pract. Core 1 & 2	Practical 1	4	89	100	9	A+	4x9=36
Pract. Core 3 & 4	Practical 2	4	85	100	9	A+	4x9=36
Seminar 1	Seminar 1	1	23	25	10	O	1x10=10
	<b>Total</b>	<b>25</b>					<b>210</b>
Thus, <b>SGPA = 210/25 = 8.4</b>							

- The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters of a program, i.e.

$$\text{CGPA} = \frac{\sum(C_i \times S_i)}{\sum C_i}$$

where  $S_i$  is the SGPA of the  $i^{\text{th}}$  semester and  $C_i$  is the total number of credits in that semester.

### Illustration for CGPA

e.g. If student scored following SGPA in each semester, then his/her CGPA shall be obtained as illustrated in below table

Semester 1	Semester 2	Semester 3	Semester 4
Credit : 25 SGPA: 8.46	Credit : 25 SGPA: 7.83	Credit : 25 SGPA: 5.69	Credit : 25 SGPA: 6.31

Thus,

$$\text{CGPA} = \frac{25 \times 8.46 + 25 \times 7.83 + 25 \times 5.69 + 25 \times 6.31}{100}$$
$$= \frac{211.5 + 195.75 + 142.45 + 157.75}{100} = \frac{707.25}{100} = \mathbf{7.0725} \quad \text{i.e. } \mathbf{7.07}$$

The SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts.

e. g. 7.0765 = 7.08 or 7.0755 = 7.07 or 6.5168 = 6.52 etc.

**Transcript (Format):** Based on the above recommendations on Letter grades, grade points and SGPA and CCPA, the institute may issue the transcript for each semester and a consolidated transcript indicating the performance in all semesters.
