Bajaj College of Science, Wardha  
Department of Botany

### BIODIVERSITY PARK

Biodiversity Park covers an area of 5.08acre (Botanical garden of formerly Jankidevi Bajaj College of Science, Wardha) at Chinchala, Wardha is located near Bajaj College of Science, Wardha. It is a unique floristic site of wilderness where native plants and animal species (Snakes-specially reptiles, rabbit, peacock, butterflies, birds, porcupines, etc.) depend on it forming an ecological community in the heart of the city. It serves as natural reserve for the conservation of local and native flora of Wardha District. Students of Botany department performed their practicals related to ecology and angiosperm taxonomy in the biodiversity park without disturbing the natural flora. Also, tree plantation drive is carried out in the rainy season to increase the tree canopy in the area. About 80 different species of local and native plants have been planted in the Biodiversity Park representing the indigenous flora of medicinal and economic importance. Documentation of plants is an ongoing activity carried out by department of Botany. The concept behind sustaining Biodiversity Park is to conserve native flora of Wardha District by *in situ* conservation. The park will soon be open for visits for schools and colleges who wish to enrich their knowledge about the indigenous plants.
