Report on Workshop on Energy Audit**

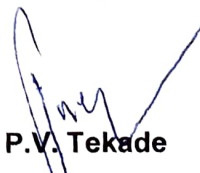

Report

In our country, the increased level of energy consumption has led to awareness regarding energy conservation among the public at a national level. The energy conservation bill along with the energy conservation Act was passed in the year 2001 and was later amended in 2010. The energy management center was reestablished and renamed as Bureau of Energy Efficiency (BEE) in the year 2002. Further in 2007, the BEE launched the Energy Conservation Building Code (ECBC) to set up the minimum requirements for the construction of buildings to attain energy efficiency by properly following the design specifications. In order to highlight the need of energy conservation techniques, a workshop on energy audit was organized on 25th February 2023 as a part of National Science day celebration for undergraduate students of mathematical sciences. Smt. Sarita Lambat from Acharya Shrimannarayan Pipri Polytechnic college was invited as a resource person. Madam not only illuminated the methods of energy audits but also highlighted the e-resources related to the audits. 43 students and faculties of physics department and electronics were present. Programme was conducted by Dr. G.V. Lakhotiya and Dr. S.H. Bagade proposed the vote of thanks.
